

Code:

```
// LED connected to pin 13
```

```
int ledPin = 13;
```

```
void setup()
```

```
{
```

```
  pinMode(ledPin, OUTPUT);
```

```
}
```

```
void blinkLED(int delayTime)
```

```
{
```

```
  // Two full ON/OFF cycles
```

```
  for(int i = 0; i < 2; i++)
```

```
  {
```

```
    digitalWrite(ledPin, HIGH); // LED ON
```

```
    delay(delayTime);
```

```
    digitalWrite(ledPin, LOW); // LED OFF
```

```
    delay(delayTime);
```

```
  }
```

```
}
```

```
void loop()
```

```
{
```

```
    // Slow Speed
```

```
    // 5 sec ON, 5 sec OFF
```

```
    blinkLED(5000);
```

```
    // Medium Speed
```

```
    // 2.5 sec ON, 2.5 sec OFF
```

```
    blinkLED(2500);
```

```
    // Fast Speed
```

```
    // 1 sec ON, 1 sec OFF
```

```
    blinkLED(1000);
```

```
    // Repeats infinitely
```

```
}
```
